

**Capital Region Meeting of the New York Solar Energy Society  
Friday, April 21<sup>st</sup>, 2017**

**12 noon to 1 PM**

**HVCC TEC-SMART 345 Hermes Road, Malta NY**

**Microinverter – Optimizer – String Inverter**

***Confused when to use which one????***

***Garrett Lee from Hudson Solar will explain the different scenarios and the strengths and weaknesses of each.***

**Bring your “green” bag lunch (drinks and treats provided)**

We welcome renewable energy installers, building efficiency experts, teachers, professional engineers, homebuilders, architects, advocates, students and all interested community members.

Wondering about the technology behind renewable energy? Please join us at the monthly noontime Capital Region meeting of the New York Solar Energy Society. We tackle solar cooking, solar heating, solar hot water, wind, ground source heat transfer (“geothermal”) and tidal and wave technology. And, we won’t leave out the deep energy retrofits for homes and the importance of mass transportation and electric vehicles.
