David Borton, Father of  
Solar Sal, reveals the  
physics of a successful  
**Solar** Boat.

**Solar Sal is in the water and proving she can pull her own!!**

**Come see for yourself and learn about how form meets function to solve transportation and environmental problems**

And celebrate the Summer Equinox

11:45 am- 1:00 pm

### AGENDA

- Meet and greet 11:45-12:00. Information on area sustainability news and events
- 12:00-1:00. How Solar Sal got built from concept to reality

We welcome renewable energy installers, building efficiency experts, teachers, professional engineers, homebuilders, architects, advocates, students and all interested community members.

Wondering about the technology behind renewable energy? Please join us at the monthly noontime Capital Region meeting of the New York Solar Energy Society. We tackle solar cooking, solar heating, solar hot water, wind, ground source heat transfer ("geothermal") and tidal and wave technology. And, we won't leave out the deep energy retrofits for homes and the importance of mass transportation and electric vehicles.

**"Support for this NYSES program has been generously provided through HVCC in collaboration with the US Department of Energy Sunshot initiative"**

Training and Education Center for  
Semiconductor Manufacturing  
and Alternative and Renewable Technologies
